# Estimated Performance Snapshot

## Learning Effectiveness

Highly effective guided learning model.

## Ease of Use

Simple navigation, but lacks onboarding flow.

## Parent Trust Potential

Strong anti-cheating positioning.

## Engagement Potential

Requires more dynamic visual elements.

# The Instant vs. Guided AI Matrix

## Competitors (Photomath / ChatGPT)

**Speed focus:** Fast

**Output:** Instant Answers

**Brain Activity:** Low (Memorization & Copying)

**Parent Reaction:** Fear of Cheating

## AI Tutoring VIP

**Speed focus:** **Process-focused**

**Output:** Step-by-step prompts

**Brain Activity:** **High** (Cognitive Load & Thinking)

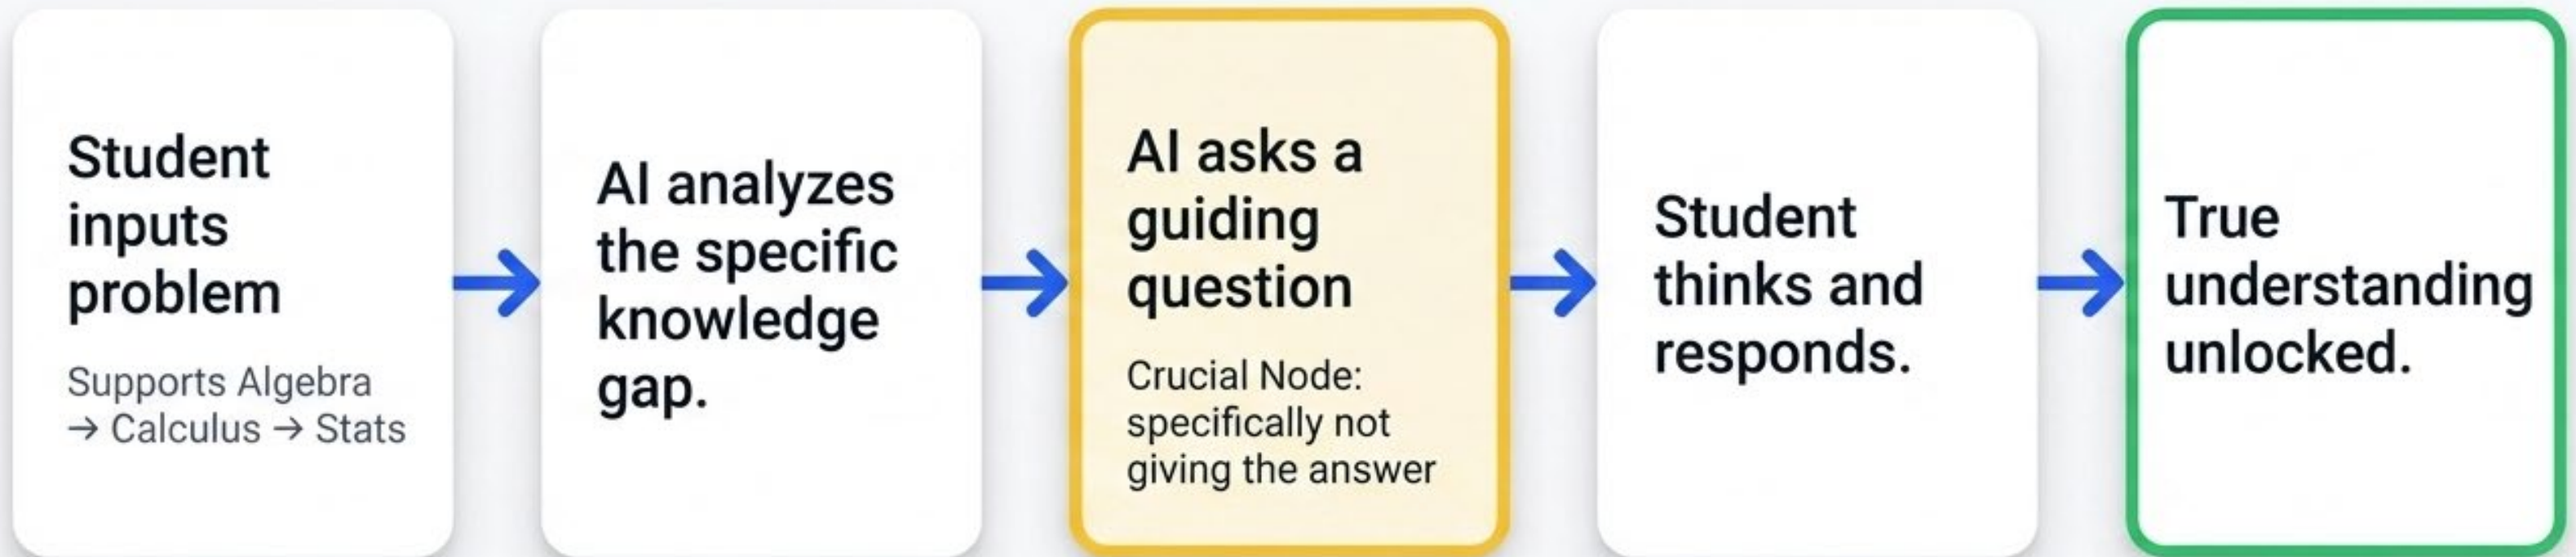

**Parent Reaction:** Deep Trust

# The Functionality Engine: A Socratic Loop

Score: 9.0/10

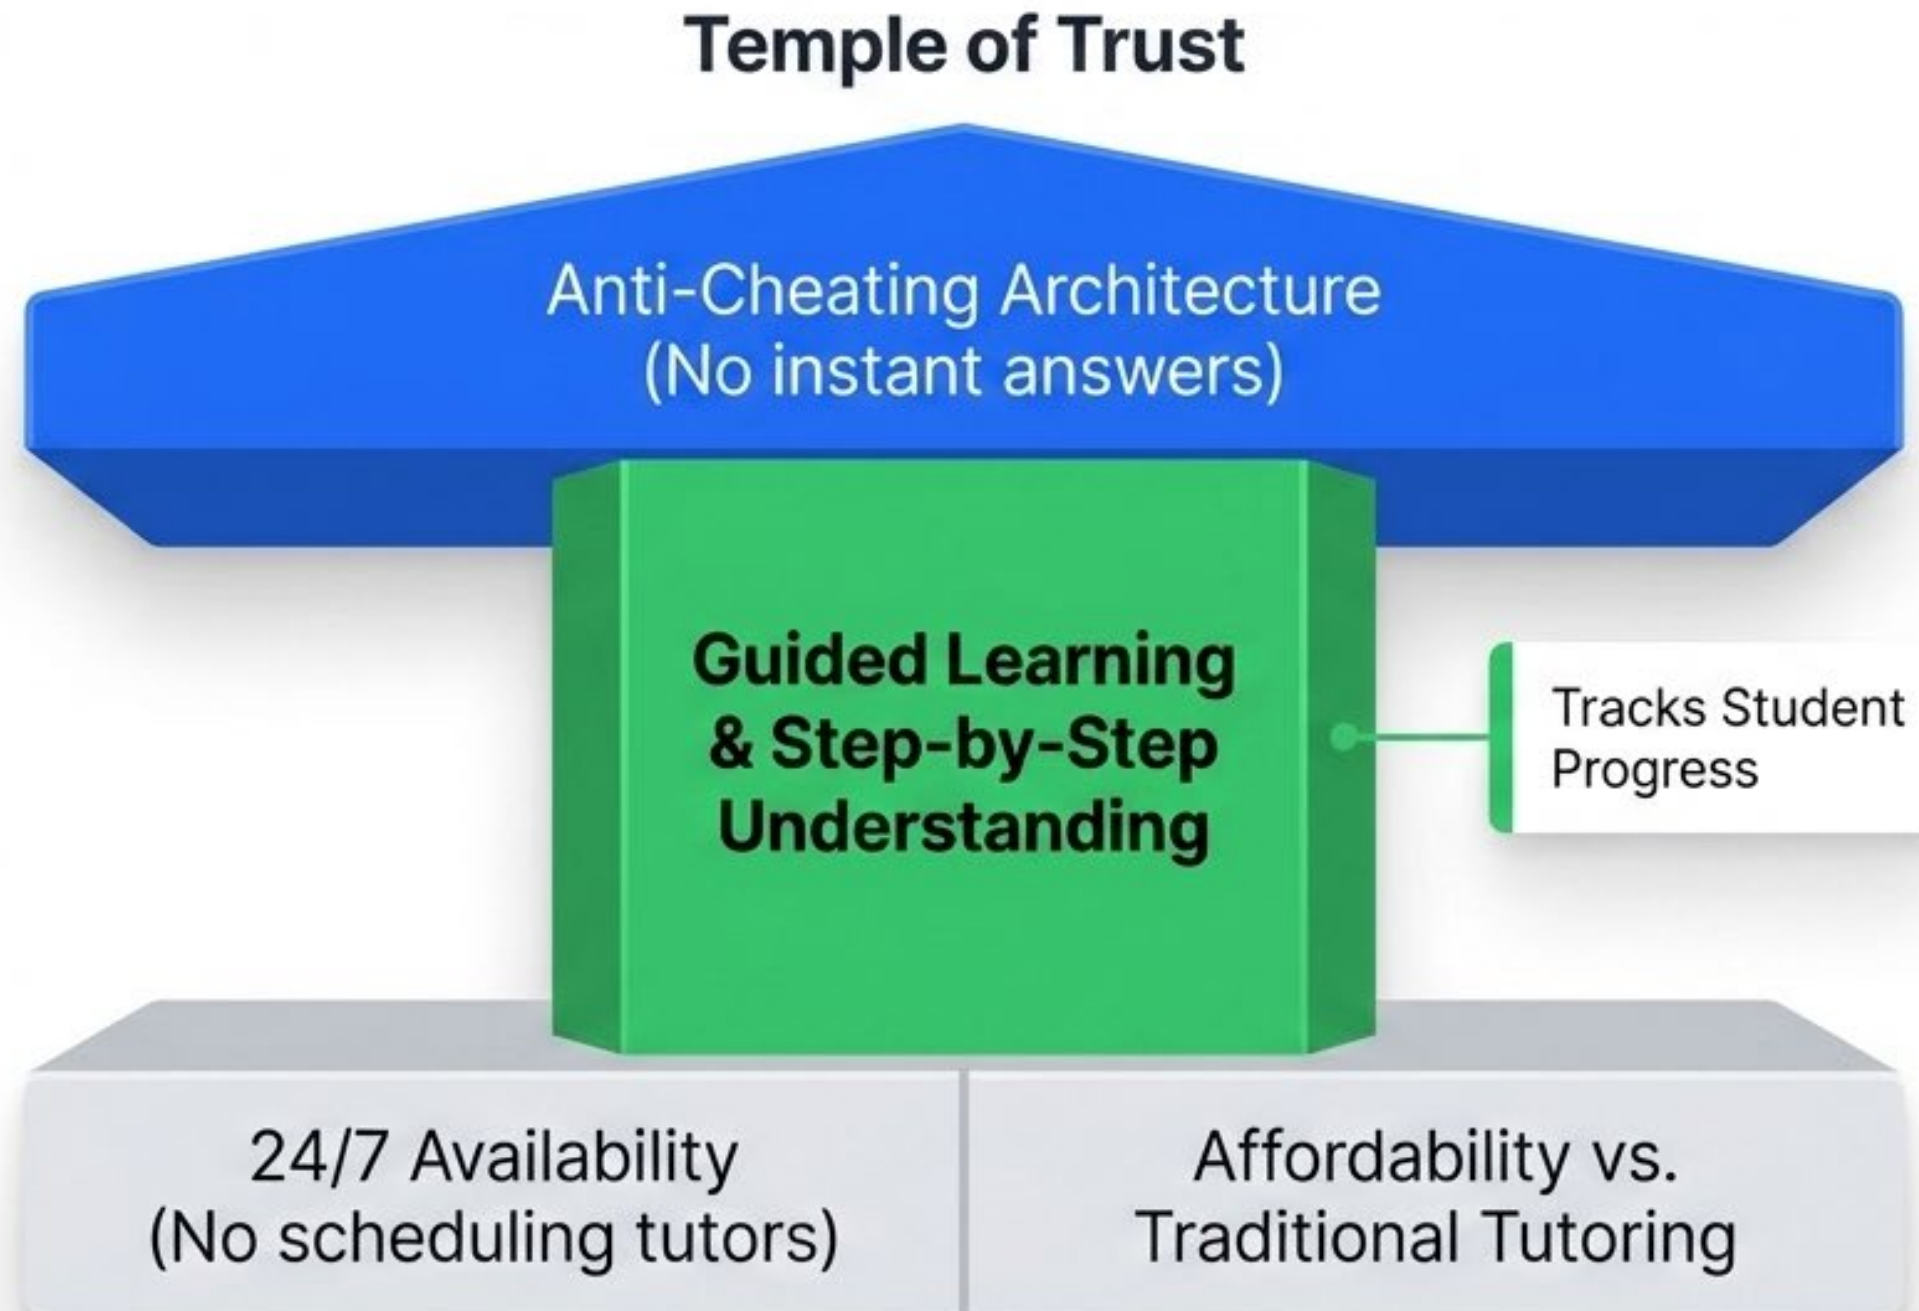

## Stepped Pathway

Adaptive interaction based on student responses makes the tech a true tutor, not a calculator.

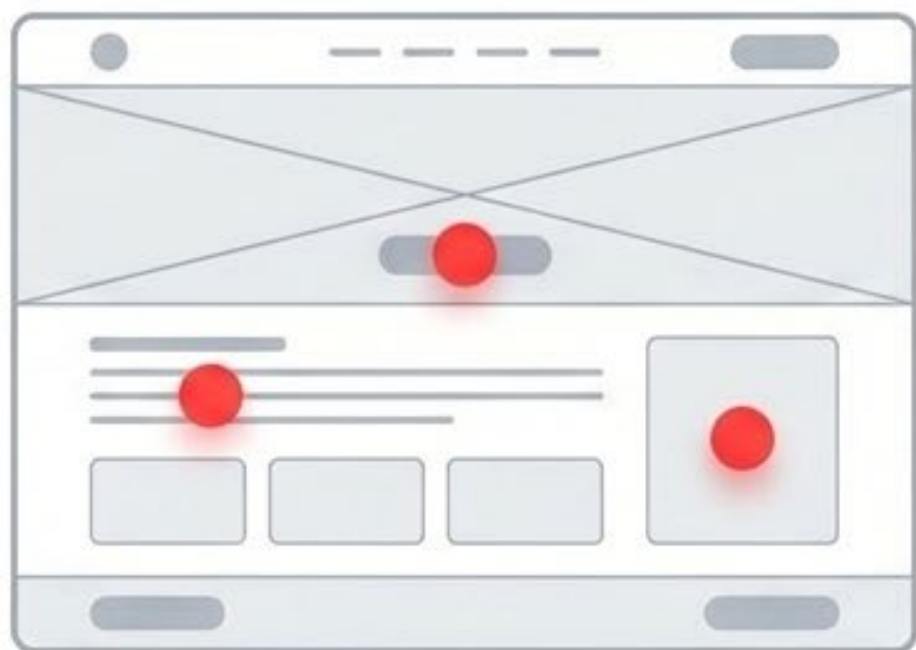

# The Parent Trust Equation

Score: 9.2/10

# Areas of Friction: Design & Content

## Design - 7.5

- Clean layout, but lacks engaging visuals (icons, diagrams, student journey).
- Weak contrast on CTA buttons.
- Missing dynamic sections (animations/interactive demos).

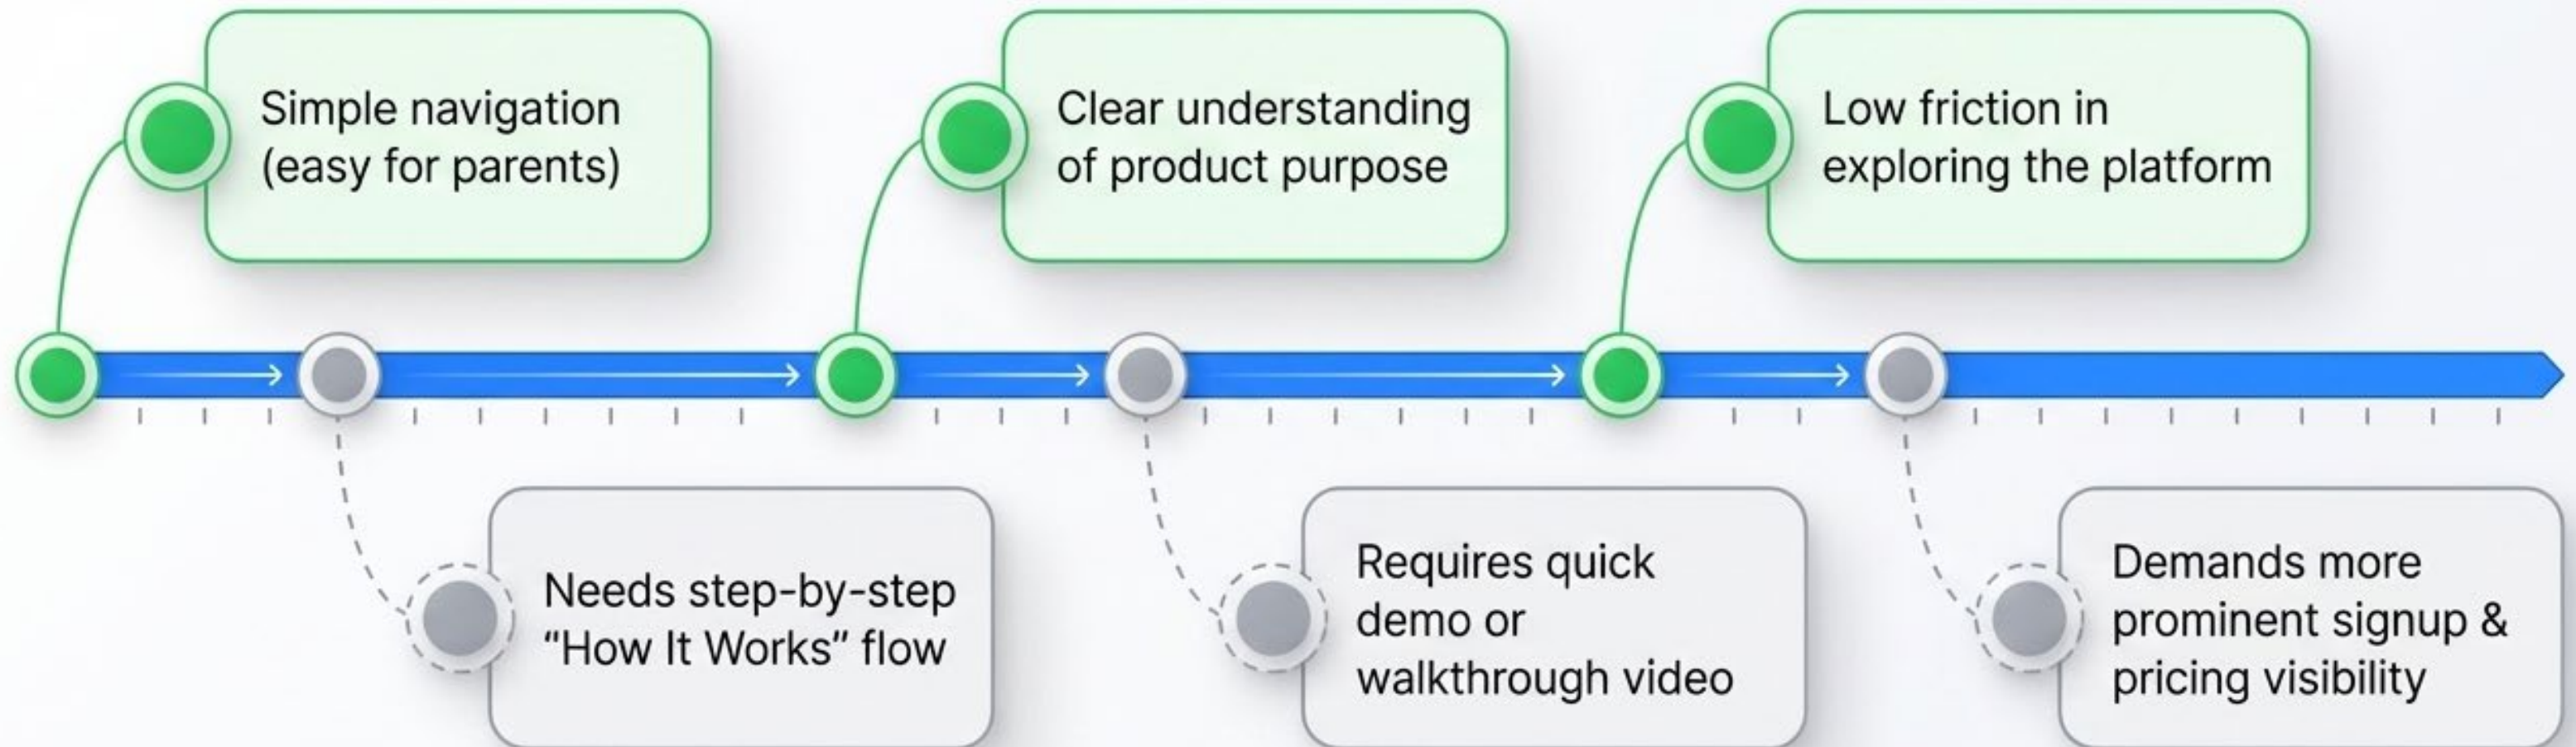

## Content - 7.5

- Strong core messaging, but lacks social proof.
- Missing real student examples and before/after outcomes.
- Missing parent testimonials.
- Missing FAQ for key concerns (screen time, accuracy).

The Guided Pathway

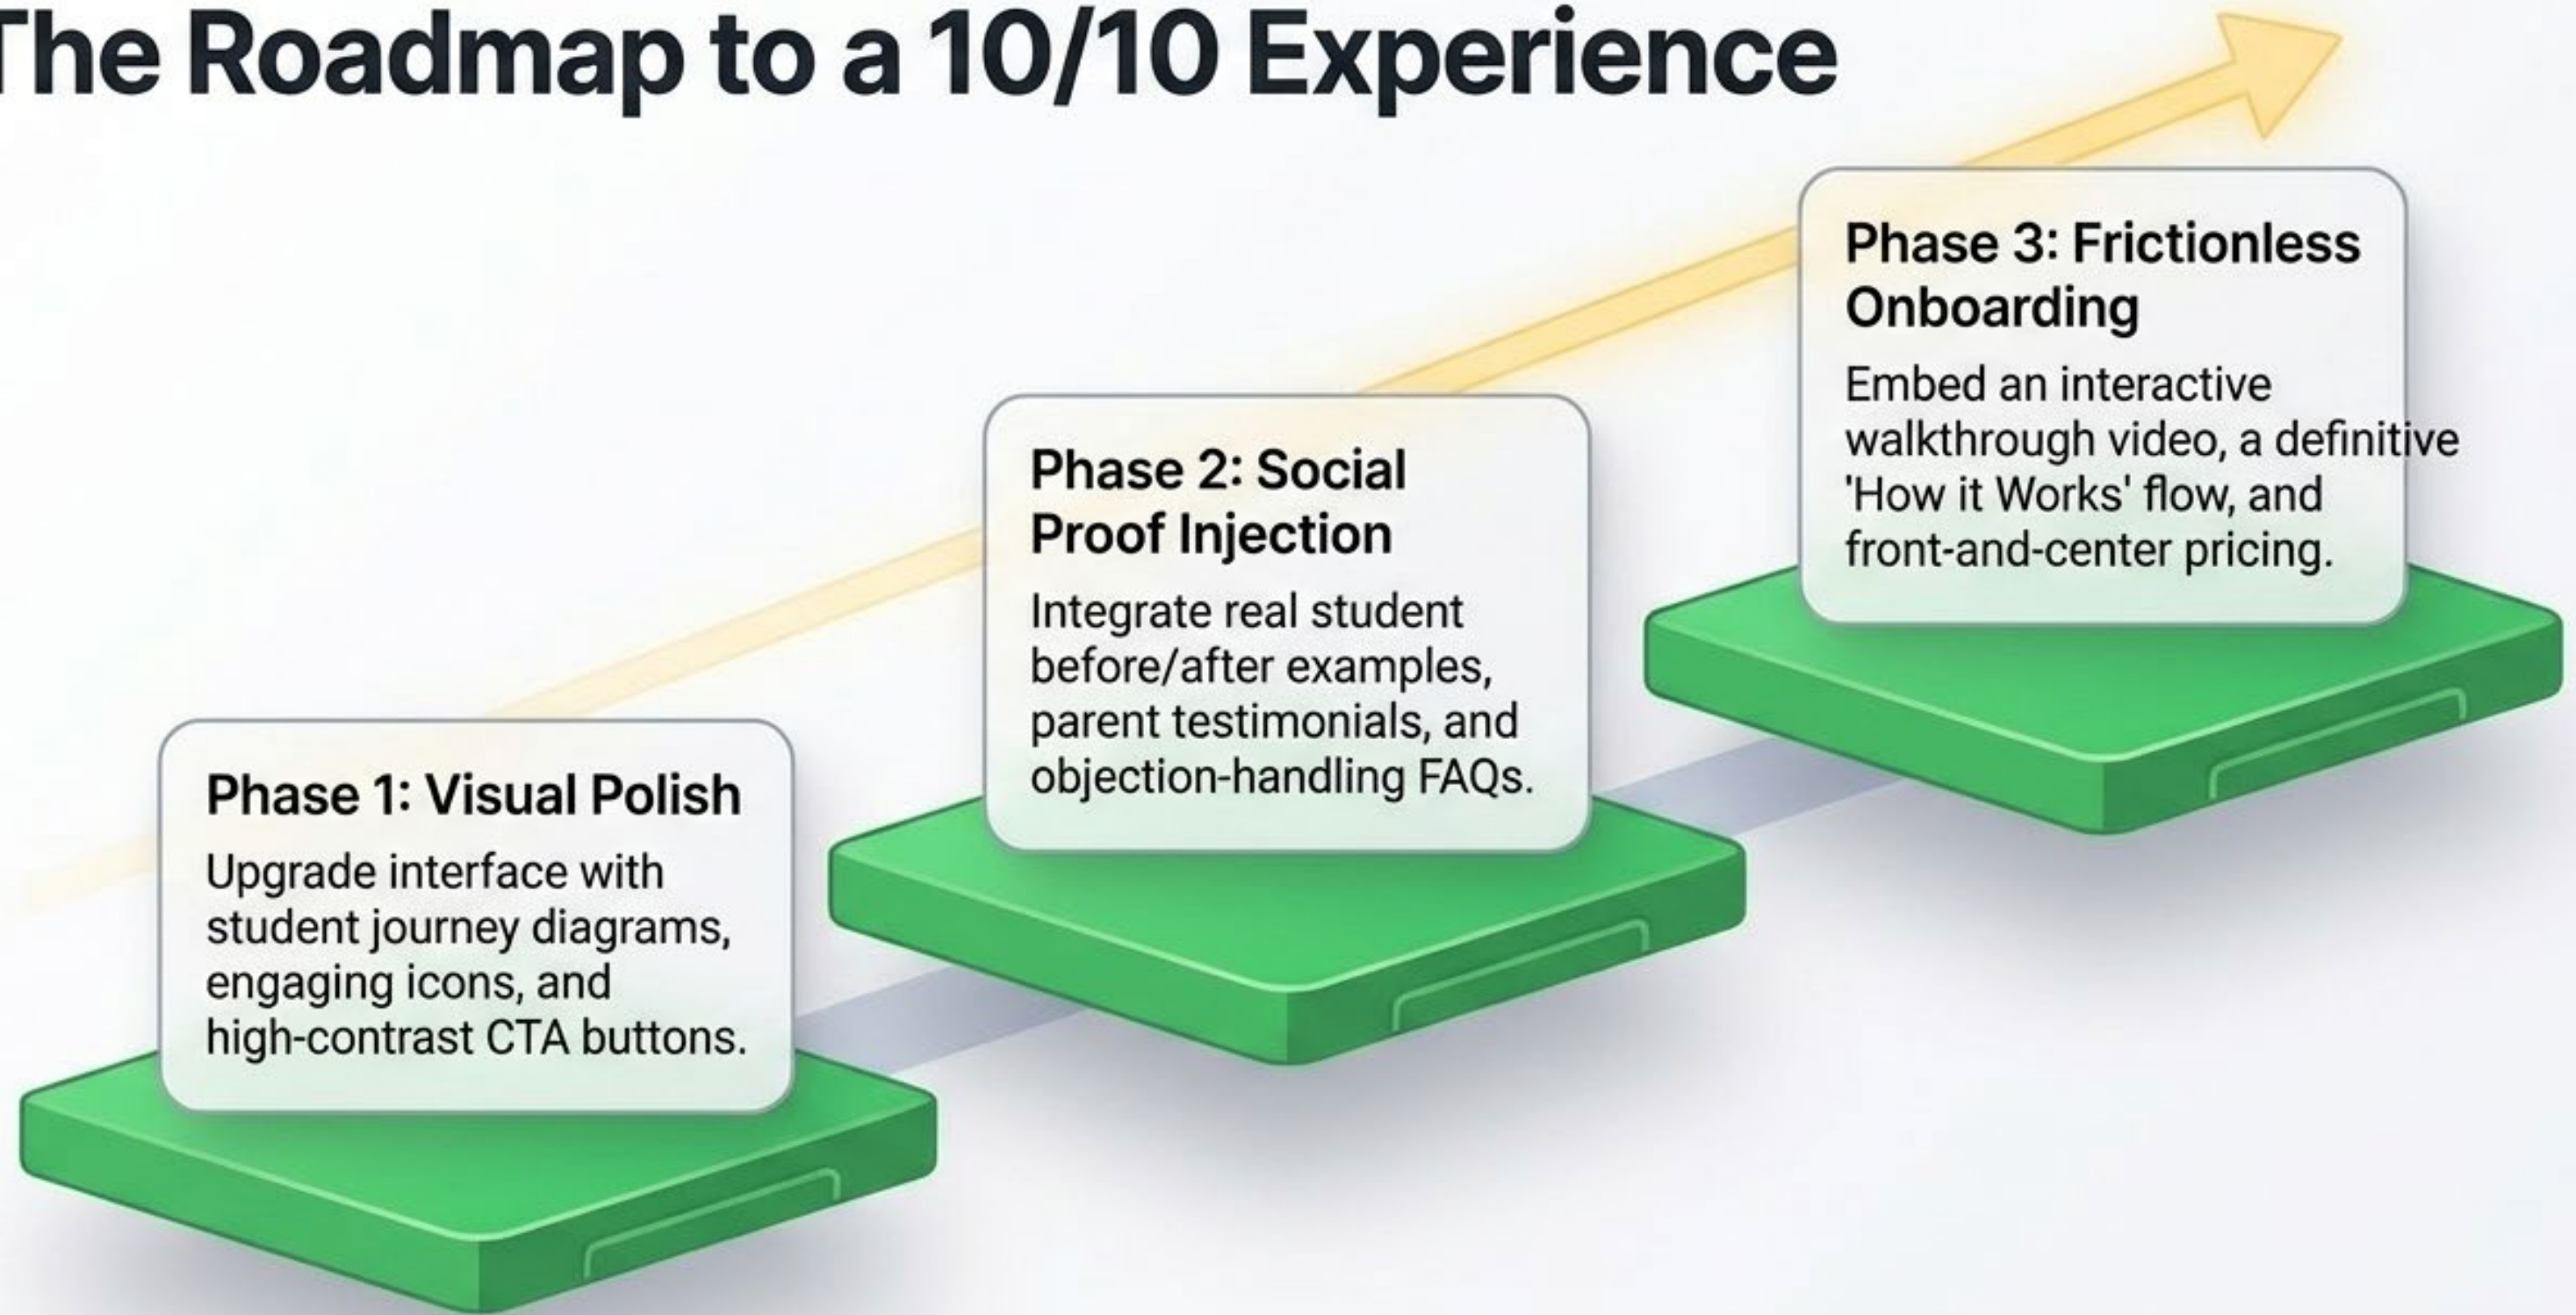

# Usability: Navigation vs. Proof

**Score: 8.0/10.** The site is easy to navigate, but lacks the necessary proof elements to convert exploration into registration.
